

Maria with Ramona & Her Sick Baby

The Dedication of Baby Karina

There was a blessed story of healing that brought about the dedication of a baby girl by the name of Karina in the small village of Cheque. The story began during the fall time of the year when Karina's mother, Ramona, appeared at the village church with her new born daughter and brought her forward to the altar for prayer. She explained to the pastor, Maria Porchas, that a San Luis doctor had diagnosed that her baby was in the developing stages of pneumonia. It appeared to Pastor Maria that Karina was a very sick baby in a threatening state of health with an alarming high fever. Maria held Karina in her arms with compassion and tears as the congregation joined with her in prayer. The following week, Ramona returned to the doctor and hospital with Karina, but no evidence could be found that she was developing pneumonia or remained in a serious condition. Ramona then returned to the church to share these things with the brethren and remained in fellowship with the believers.

Ramona's husband, a traditional catholic, responded somewhat slowly to his wife's actions in trusting their child to the prayer and faith of the Cheque church fellowship. But, the recovery of baby Karina was undeniable and after some time of thought and thankfulness of what the Lord had done, both Ramona and her husband agreed to ask Maria to dedicate Karina unto the Lord before the church brethren. May the Lord's grace rest upon this family.

The Lord is faithful!

I have done a pictorial presentation of this event which will be emailed to JEM members and friends. May the Lord's grace rest upon this family. The Lord is faithful.
